Re: Testing for pesticides in sugar

United Sugars Corporation adheres to the following practice in testing for pesticides:

Pesticide Residue is checked annually with each new crop. The attributes tested for is the CDFA Package. Our sugar is guaranteed to meet the CODEX standards for pesticide residue. A list of the pesticides included in the test is available upon request.

We moved to this schedule after sufficient historical data indicated that more frequent testing was not required.

Please call or write if you have any questions or concerns. United Sugars Corporation is committed to continued service to our valued customers.
