Re: Invert Sugar

This memo is to confirm that all sugar produced and sold by United Sugars meets FDA regulations as food grade product for human consumption and is produced under current Good Manufacturing Practices as mandated by the Federal Food, Drug and Cosmetic Act.

In addition, this sugar meets Food Chemical CODEX standards for Invert Sugar which states that invert should be not more than 0.100%. Invert is not an issue in beet sugar. Cane sugar is tested regularly on a composite basis to make sure the value remains within our standard of no more than 0.050%. Historically, invert in our cane sugar is less than 0.010%.

Please call or write if you have any questions or concerns. United Sugars Corporation is committed to continued service to our valued customers.
