

Lot Code Format

Bulk Products: PYYDDDTTTT

P identifies the packaging plant (see list of identifiers below)
Y identifies the last two digits of the year
D identifies the Julian day of the year
T identifies the military time

Example: F071860800

Packaged Products: PYDDD or PYDDD-N

P and **D** as identified above; **Y** identifies the last digit only of the year.
N - single digit number that identifies the source (bulk) lot for this lot.

Example: F7129 or L7247-2

Note: There should be no spaces between characters in the lot code. However, materials packaged by sugar producers may have numbers or letters following the “DDD.” There should be a space between the lot code and these additional characters. These designations are for the producing plant and are not a part of the lot identity. **Materials packaged by co-packers may have a dash and a number following the “DDD.” These tie the lot to a specific source lot and are a part of the lot identity.**
