

Lot Code Format

Lot code format change over is due to the transition of computer systems. Some locations will transfer earlier than others; the anticipated date that the transition will be complete February 28, 2023.

Bulk Products: PPPYYDDD99

- P identifies the packaging plant (see list of identifiers below)
- Y identifies the last two digits of the year
- D identifies the Julian day of the year
- 99 identifies the numeric sequential number for the day

Example: CRK2027404

Packaged Products:

PPPYYDDD

PPP identifies the packaging plant

YY identifies the last two digits of the year

DDD identifies the Julian day of the year

N is a single digit number that identifies the source (bulk) lot for this lot – used by co-packers

Example: CRK20274 or SF220274-2

Note:

For sugar producers: There should be no spaces between characters in the lot code. However, materials packaged by sugar producers may have numbers or letters following the “DDD.” There should be a space between the lot code and these additional characters. These designations provide information for the producing plant and are not a part of the lot identity.

For co-packers: Materials packaged by co-packers may have a dash and a number following the “DDD.” These tie the lot to a specific source lot and are a part of the lot identity.

See next page for plant identifiers.
