

Liquid Sucrose LCMT

Our Liquid LCMT is made by dissolving purified crystalline sucrose in water, which is then filtered, decolorized, cooled, and stored. The exacting chemical, physical, and microbiological standards of this sugar make it ideal for use in products whose formulation requires a low color sweetener and receives limited processing.

Applications

- Canned and bottled products
- Dairy products
- Beverages
- Soft drinks
- Processed foods
- Confectionery
- Baking

Available Sizes

Industrial Sizes: 5,000 gallon tank trucks
